Pratyush Prasanna Sahu

Software Engineer – Backend | +91 86677-04613 | pratzahu.ps@gmail.com | LinkedIn | GitHub

SUMMARY

Backend Engineer with 5+ years of experience building payment, compliance, and enterprise platforms, backed by a full-time Master's in Computer Science. Specializes in Java, Spring Boot, REST APIs, and event-driven systems, with measurable results including 40% faster API responses, 20% lower Kafka latency, and 10 hours of manual work eliminated each week.

SKILLS

Languages: Java, SQL, Python, JavaScript
Backend & Frontend: Spring Boot, Spring Batch, Hibernate, Node.js, REST APIs, Microservices, JSON Patch, React, TypeScript
Messaging, CI/CD & Observability: AMQ, Kafka, CloudEvents, Git, Maven, Jenkins, Harness, JFrog, Datadog, OpenTelemetry, Splunk
Databases & Analytics: Oracle, MySQL, BigQuery, PostgreSQL, Elasticsearch

EXPERIENCE

Optimum Solutions Pte. Ltd. | Client - PayPal **Bengaluru, KA, India**
Software Engineer II *(July 2025 – Present)*

- Engineered a **Java** and **Spring Boot** CIP verification flow for **~144K** monthly Brazil sign-ups across a **6.5M-account portfolio**, integrating IBM ODM decision tables and biometric verification with a nine-retry limit and feature-flagged rollout; biometric checks cost **~$0.48** each versus **$1.99** for manual review.
- Refactored Australian CIP onboarding rules in **Java** and **Oracle**-backed processing, removing document-type gates and fixing three race conditions in a flow designed to support up to 85K additional monthly verifications against **$140M in annual TPV exposure**.
- Shipped Java verification rules across four China business structures, integrating DataZoo, due-diligence events, SFTP ingestion, and BigQuery for a program with an estimated **$1.5M - $1.7M** in annualized backbook revenue exposure.
- Implemented event-driven Java synchronization between two China merchant systems using **CloudEvents** and **REST APIs**, mapping restriction severity to automated re-verification through **14 policy rules** and delivering **9 service changes** and **3 API specification changes**.
- Launched a new customer verification API integrated with three third-party services, enhancing security and processing over **200K verification** requests per month.
- Migrated China consumer KYC to a two-tier Java and IBM ODM workflow, adding three transaction counters and approximately 11 policy rules, **fixing a dormant counter defect**, and reaching full rollout in two weeks.

One Community Global Inc. **San Gabriel, CA, United States**
Software Engineer *(Nov 2024 – June 2025)*

- Accelerated **Spring Boot** REST API responses by **40% by profiling slow requests**, optimizing **SQL** queries, and caching frequently accessed data to **reduce repeated database work**.
- Optimized **Kafka** event processing to cut pipeline **latency by 20%**, strengthening asynchronous fault handling and building modular Java, Spring Boot, and **Hibernate** services used by four downstream teams.

Tata Consultancy Services | Client - SAP **Bengaluru, KA, India**
System Engineer *(May 2019 – June 2022)*

- Automated reconciliation across five enterprise systems through **REST APIs**, saving 10 hours per week; developed **SAPUI5** workflows and reusable React components for 200 users, reducing turnaround time by 30%.
- Sustained 99.9% uptime for **PostgreSQL**-backed **Node.js** REST services by tuning API and database operations and using **Elasticsearch** to diagnose production issues.

PROJECTS

AI Support Knowledge Assistant | Python, FastAPI, LangChain, PostgreSQL, pgvector, OpenAI API GitHub

- Implemented a retrieval-augmented Q&A workflow that ingests PDFs and text, stores chunk embeddings in pgvector, applies metadata-filtered semantic search, and returns answers with source citations.

Care Access Orchestration Platform | Java, Spring Boot, Spring AI, PostgreSQL, Kafka GitHub

- Engineered a patient-facing appointment platform that turns natural-language requests into provider searches, validates referral and coverage requirements, and coordinates booking, cancellations, and waitlists with concurrency controls to prevent duplicate bookings.

EDUCATION

California State University, Fullerton, United States of America Master of Science, Computer Science [2022 - 2024]
SRM Institute of Science and Technology, Chennai, India Bachelor of Technology, Electronics and Communication [2015 - 2019]
